

## Another writing from the heart" ... A facebook post by Stacey Bainbridge 2023-06-22

Just read Jonathon's email to us again.

Do you all think we are the problem?

We make people feel uncomfortable ? So these same people that we make feel uncomfortable are they comfortable with abusers ??

He can't arrange meeting here that we would feel at ease, does that not scare people ?

We ask for no abusers or people that cover up for them to not be here.

They have ask people with allegations not to come, so they are aware, have been aware but have been willing to expose all of us this filth for years.

Picture this, we dig out the "workers" pictures from the 29 years of allowing convention to be conducted here on our property. We have 3 small children, with lots of hype of convention coming, "friends" and "workers".

What do we see in those picture

Men that have raped, molested and taken innocence and trust from the lives of many precious people. Then the abused are cast aside, shunned and victimized again by the very same men and women that thought is was a good idea to trust these abusers. These people feel that they deserve to have better than everyone else here at convention. Did you ever wonder about that? Workers making sure workers have better than everyone else. "Don't touch that it's for the workers". "Don't touch that it's for the visitors." We would move out of our house to make room for workers. I would clean and clean and get it all ready only to have them come in and look down their nose and re clean re organize while making us feel inadequate and people to be pitied. Bob gave up his career to live here. We gave our best but it was Never Ever good enough. You had the feeling of being patted on the head, (not by all workers) there there you did your best. And what did we do? We tried harder, tried to do better.

We have been a necessary annoyance here. Wayne H was so determined to push and squeeze us out of here. He even had someone lined up to move here to replace us! This is our home. Who said we were going anywhere ????? I'd love to hear what that conversation was.

### **The lies the deception 🙄**

Ignorance " friends" is not an excuse, yes this is everyone's fight. If it's not your fight does that mean you are willing to put your kids grandkids in harms way, have men/ women looking at your kids and lusting after them? These men are covering up and condoning filth. **Lying, this is nothing "new" they have known for years.**
